THE PRINCIPLES AND PRACTICE OF LAND DRAINAGE: Embracing a brief History of Underdraining; a detailed examination of its Operation and Advantages; a Description of various kinds of Drains, with Practical Directions for their Construction, the Manutacters of Drain Tile, etc., etc. Illustrated by nearly One Hundred Engravings. By Jons H. Kuppant, Author of the "Wheat Plant;" Corresponding Secretary of the Ohio State Board of Agriculture, etc. Cincinnati: Engrar Clarke & Co., Publishers and Booksetlers, 1861.

This important agricultural work forms handsome volume of about four hundred and fifty pages. The subject of Land Drainage, which has of late been thoroughly studied in Europe, particularly in Great Britain, with great advantage is yet but imperfectly understood in the United States. The object of this work of Mr. KLIPPART is to supply the needed information in a plain, practical way, easily comprehended by any intelligent farmer.

In the Introduction, a history of Drainage among the ancients is given, together with an account of its progress in England, France and the United States. The body of the work is divided into two parts-in the first, the Theory of Drainage is discussed in eighteen chapters; and in the second part, the Practice of Drainage is elucidated in thirteen chapters. An appendix gives the laws of Obio relating to Drainage, followed by a copious Index to the entire work.

We have space to notice specifically only a few characteristics of this valuable work. In the first part, some of the advantages of underdraining are summed up and thoroughly explained under the tollowing heads: 1. It re' moves stagnant waters from the surface. 2, It removes surplus waters from under the surface. 3 It lengthens the working season 4. It deepens the soil. 5. It warms the undersoil. 6. It equalizes the temperature of the soil during the season of growth. 7. It carries down soluble substances to the roots of the plants. 8. It prevents "freezing out," "heaving out," or "winter killing." 9. It prevents injury from drought 10, it improves the quantity and quality of crop; it increases the effect of manures 11. It prevents rust in wheat, and rot in pota toes. These advantages are not suppositions but are proved by the actual experience of in telligent men, which is given in detail.

In the second part of the book are given practical directions for the location, cutting and lay ing of the various kinds of drains, according to the position and quality of the land; modes of preventing and removing obstructions in drains descriptions of the tools, the various improved plows, and other inventions used in the operations; and of the several kinds of tile, their respective advantages, and minute directions for their manufacture, including the selection and working of the materials, molding, drying and baking of the tile, etc., etc.

For \$1,25, the price of the work, the publishers will send a copy by mail, pre-paid, to any

REPORTED FOR THE STATESMAN.

Latest from Washington. WASHINGTON, March 9 .- Mr. Chase, Secreta ry of the Treasury, informed a Senator, to-day, that the collectorabip for New York had been decided. Hiram Barney is the lucky man.—
The other New York appointments will be made early next week. Wakefield will be Surveyor; Webb, Naval Officer; and Hox, Postmaster.—
The others have not been settled. It is believed that General Nye will get the Marshal-

There is no truth whatever in the statement that preliminary steps have been taken for an interview between the Commissioners of the Southern Confederacy and President Lincoln, The latter will hold no counsel with these gentlemen, nor will be recognize them, except as violators of the law of the land.

New York, March 11,-The Herald's Wash ington correspondence states that political cir-cles were feveriably excited yesterday, by the report that the evacuation of Forts Sumter and Pickens was determined upon in Cabinet coun-cil, on Saturday night. It is now certain that their stock of provisions is almost exhausted — Several Republican Senators repeatedly declar-ed that such policy was decided upon, while

effectual Alterative that can be made. I a concentrated extract of Pura Sarsapari so combined with other substances of greater alterative power as to afford an eftive antidote for the diseases Sarsaparille reputed to cure. It is believed that sucremedy is wanted by those who suffer fr Strumous complaints, and that one which a accomplish their cure must prove of immuservice to this large class of our afficied fellocitizens. How completely this compound y do it has been proven by experiment on ma of the worst cases to be found of the follow complaints:

SCHOPULA AND SCROPULOUS COMPLAINT ERUPTIONS AND ERUPTIVE DISEASES, ULCURA, PIMPLES, BLOTCHES, TUMORS, SALT RHEUM, SCALD HEAD, SYPHILIS AND SYPHILITIC APPECTIONS, MERCURIAL DISEASE, DROPSY, NEERALGIA OR TIC DOULOUREUX, DEBILITY, DYSPEPSIA AND INDICESTION, ERYSIPELAS, ROSE OR ST. ANTHONY'S FIRE, and indeed the whole class of complaints arising from Impurity of the Blood. THE BLOOD.

class of complaints arising from INPURITY OF THE BLOOD.

This compound will be found a great promoter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the timely expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the bedy by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, cruptions, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no lasting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations pretending to be concentrated extracts of i contain but little of the virtue of Sarsaparilla or any thing else.

or any thing else.

During late years the public have been misled by large bottles, pretending to give a quart
of Extract of Sarsaparilla for one dollar. Most
of these have been frauds upon the sick, for
they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the sarsaparilla which flood the market, until the name itself is justly despised, and has become synonymous with imposition and cheat. Still we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it. And we think we have ground for believing it has virtues which are irresistible by the ordinary way of the discoveries. by the ordinary run of the diseases it is intendto cure. In order to secure their cor radication from the system, the remedy should be judiciously taken according to directions on PREPARED BY
